EXPERIENCE

THE FARM 51

Principal Animation Engineer

2025 – Present

Rescue Drone Simulator

- Own networked animation, movement, and Enhanced Input systems for Rescue Drone Simulator, built fully for multiplayer.
- Shape player/drone handling feel: camera, response curves, and control weight.
- Own the game's CPU budget: profile and enforce frame costs in Unreal Insights.
- Build AnimFlex, an AI plugin that automates mocap cleanup for character gestures and locomotion, saving artist time.

Lead Combat Engineer

2021 – 2025

Chernobylite 2: Exclusion Zone

- Built and led a team of 10+ animators, programmers, and character artists from day one: hiring, reviews, and production planning.
- Owned mocap production across planning, direction, and delivery.
- Designed the full combat loop and owned player 3C, with FPP and TPP on a single skeletal mesh.
- Authored a custom C++ Gameplay Ability System so designers can set up abilities without GAS boilerplate, and shipped Motion Matching for the main hero.
- Built Chernobylite 2's dialogue system and scaled animation pipeline tools for the full team.

Lead Animator & Programmer

2019 – 2021

Chernobylite 1

- Led three animators: gave feedback and built DataTable-driven procedural animation tools and MotionBuilder UX plugins.
- Implemented every cutscene in the game.
- Owned the animation production schedule and quality bar through Chernobylite 1's release.
- Optimized animation, character movement, and collision CPU cost for console frame budgets on Sony devkits.

Animation Programmer

2018 – 2019

Chernobylite 1

- Grew early prototypes into production movement, animation, and combat systems.
- Built the dialogue system (logic and animations).
- Directed motion capture sessions for all character animations in the game.

Junior Programmer

2017 – 2018

Chernobylite 1

- Prototyped main-character game input.
- Animated locomotion prototypes for every enemy in the game.
- Built gunplay prototypes in code and animation.
- Owned the early character animation and rigging pipeline.

SKILLS

Stack

C++, Unreal Engine, linear algebra, Python

Tools

Visual Studio, ReSharper, Unreal Insights, Rewind Debugger, Enhanced Input, Animation Blueprints, Control Rigs, Behavior Trees, State Trees, Sequencer, IK Retargeter, Maya, MotionBuilder, Perforce, Jenkins, Jira

Focus

Animation systems, rapid prototyping, CPU optimization, team leadership, procedural animation, 3C & gameplay programming, combat design, animator pipelines, motion capture director

LOCATION

Silesia, Poland

EDUCATION

University of Silesia

2014 – 2017

Engineer, Computer Science

Specialization: Game Programmer

LANGUAGES

Polish, English

OTHER

Polish National Amateur Muay Thai champion
