## EXPERIENCE

### THE FARM 51

#### Principal Animation Engineer

2025 – Present

Rescue Drone Simulator

- Populate cities with Unreal 5.8 MetaHuman Mass and ASTP.
- Own networked animation, Mover-based drone movement, and Enhanced Input for Rescue Drone Simulator, built fully for multiplayer.
- Shape player/drone handling feel: camera, response curves, and control weight.
- Own the game's CPU budget via Unreal Insights and Animation Budget Allocator.
- Build AnimFlex, an AI plugin that automates mocap cleanup for character gestures and locomotion, saving artist time.

#### Lead Combat Engineer

2021 – 2025

Chernobylite 2: Exclusion Zone

- Led a team of 10+ animators, programmers, and character artists from day one through Chernobylite 2 ship: hiring, reviews, and production planning.
- Owned mocap production across planning, direction, and delivery.
- Designed the full combat loop and owned player 3C, with FPP and TPP on a single skeletal mesh and custom IK solutions.
- Authored a custom C++ Gameplay Ability System so designers can set up abilities without GAS boilerplate, and shipped Motion Matching for the main hero.
- Built Chernobylite 2's dialogue system, MetaHuman character pipeline, and scaled animation tools for the full team.

#### Lead Animator & Programmer

2019 – 2021

Chernobylite 1

- Led three animators: gave feedback and built DataTable-driven procedural animation tools and MotionBuilder UX plugins.
- Implemented every cutscene in the game.
- Shipped Chernobylite 1; owned animation schedule and quality from early production through release.
- Optimized animation, character movement, and collision CPU cost for console frame budgets on Sony devkits.

#### Animation Programmer

2018 – 2019

Chernobylite 1

- Grew early prototypes into production movement, animation, and combat systems.
- Built the dialogue system (logic and animations).
- Directed motion capture sessions for all character animations in the game.

#### Junior Programmer

2017 – 2018

Chernobylite 1

- Prototyped main-character game input.
- Animated locomotion prototypes for every enemy in the game.
- Built gunplay prototypes in code and animation.
- Joined Chernobylite 1 at the start; owned the early character animation and rigging pipeline.

## SKILLS

### Stack

C++, Unreal Engine, linear algebra, Python

### Tools

Visual Studio, ReSharper, Unreal Insights, Rewind Debugger, Enhanced Input, Mover, Animation Blueprints, Control Rigs, State Trees, Sequencer, MetaHumans, Mass, IK Retargeter, Maya, MotionBuilder, Perforce, Jenkins, Jira

### Focus

Animation systems, CPU optimization, team leadership, procedural animation, 3C & gameplay programming, combat design, animator pipelines, motion capture director, rapid prototyping

## LOCATION

Silesia, Poland

## EDUCATION

### University of Silesia

2014 – 2017

Engineer, Computer Science

Specialization: Game Programmer

## LANGUAGES

Polish, English

## OTHER

Polish National Amateur Muay Thai champion
